**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 24 September 2002.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Election/Restrictions***

1. Applicant's election of claims 1-11 and 18 in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-3, 5-7, and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Twerdochlib et al (5,146,776, disclosed in IDS).

As for claim 1, Twerdochlib et al show a fiber optic sensor comprising:

- a light source;
- a light receiving system (photodiode) for receiving at least a portion of the beam of light;

Art Unit: 2877

a light modulating system (26);

a processing system.

As for claim 2, the modulating system is an obstruction modulator.

As for claim 3, the modulating system modulates the light beam by obstructing the light beam.

As for claim 5, the system has a housing with two openings and the obstruction modulator cantilevered on the housing.

As for claim 6, the obstruction modulator is a physical component of the machine.

As for claim 7, since the light receiving system is a photodiode, the light receiving system inherently outputs a voltage signal indicative of vibration of the machine.

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

It is noted that the invention is not patentable over Tverdochlib et al

as applied to claim 1 above further in view of:

As for claim 4, it would be inherent that the obstruction modulator either completely blocks the light, partially blocks the light or completely lets the light through and that it would not matter which it does when the machine is not vibrating. Therefore, it would be a matter of

Art Unit: 2877

design choice to the skilled artisan of what the modulator does when the machine is not vibrating including obstructing the light beam when the machine is not vibrating.

*Allowable Subject Matter*

6. Claims 8-11 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to show or to suggest a system for sensing vibration of a machine comprising of all the elements as presently claimed in claim 8 wherein the system has a second light modulating system in series with the first light modulating system.

*Conclusion*

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Robertson (5,359,445) shows a fiber optic sensor.

Papers related to this application may be submitted to Technology Center (TC) 2800 by facsimile transmission. Papers should be faxed to TC 2800 via the PTO Fax Center located in CP4-4C23. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CP4 Fax Center handles regular communications and 703-872-9319 for After Final communications

If the Applicant wishes to send a Fax dealing with either a Proposed Amendment or for discussion for a phone interview then the fax should:

Art Unit: 2877

a) Contain either the statement "DRAFT" or "PROPOSED AMENDMENT" on the Fax Cover Sheet; and

b) Should be unsigned by the attorney or agent.

This will ensure that it will not be entered into the case and will be forwarded to the examiner as quickly as possible.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Hwa Lee whose telephone number is (703) 305-0538.

The examiner can normally be reached on M-Th. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on 703-308-4881.
